

Risk Assessments

At HSE Solutions we can provide a range of Risk Assessment services for your workplace, office or site. These can include:

- The evaluation of human health impacts of various work procedures
- Usage, handling, storage, transport and disposal of a range of hazardous substances
- Provision of expert information to all levels of management

With our range of personnel and the diversity of their skills, we can provide Hazard Management services for any plant or hazardous substance issues in the workplace.

Our spectrum of services in this area can range from risk assessments following accidents or incidents through to specific Management cases.

Risk Assessment Services:

- Confined Spaces Management
- Risk Assessments of plant and equipment
- Training on work procedures
- Development of Hazardous Substances Management Systems
- Preparation of material safety data sheets
- Evaluation of Toxicology Data on workplace substances
- Risk Communication
- Interpretation of contaminant levels against national & international standards

These services can be either of a specific or general nature, depending on your needs. HSE Solutions employees are finely suited to perform your Risk Assessment needs, due to our broad range of scientific training and expertise.

Examples of some of the assessments that we regularly conduct are:

- DSE Assessments (Display Screen Equipment)
- Manual Handling Assessments
- COSHH Assessments (Control of Substances hazardous to Health)
- PPE Assessment (Personal Protective Equipment)
- Workplace Noise Assessments
- Workplace Vibration Assessments
- Asbestos Assessments
- Lead Assessments
- Environmental Assessments
- Flood Assessments

This list is not exhaustive, if you need an assessment, HSE Solutions will be able to facilitate it.
